

## A Rich & Diverse Portfolio of Projects

- ▶ Lone Star - Copper Gold - *Drilling in Progress*
- ▶ Kibby Basin - Lithium - *Drilling in Progress*
- ▶ CBC - Copper-Gold - *Drilling Completed (assays pending)*

### ★ Kibby Lithium Project

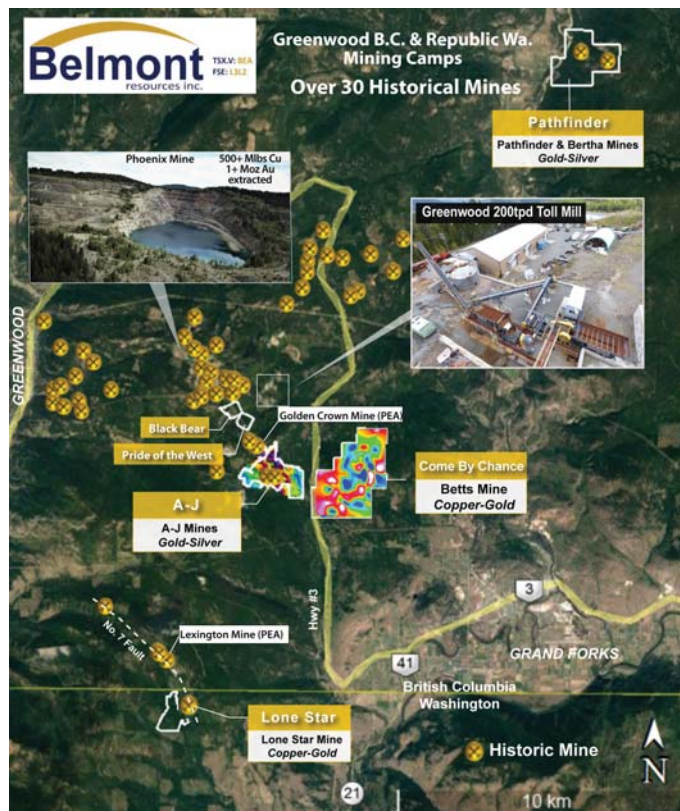

- 3,000m drill program in progress
- Targeting large potential lithium brine aquifer (highly conductive anomaly)
- Kibby Valley basin similar features to Clayton Valley basin 60kms south
- Fully water permitted

### ★ Lone Star - Copper-Gold Mine

- Past producing mine with historic resource
- 7,888m drilling program recently completed.
- 43-101 resource in progress
- Preliminary Economic Assessment to follow

### ★ CBC Copper-Gold Project

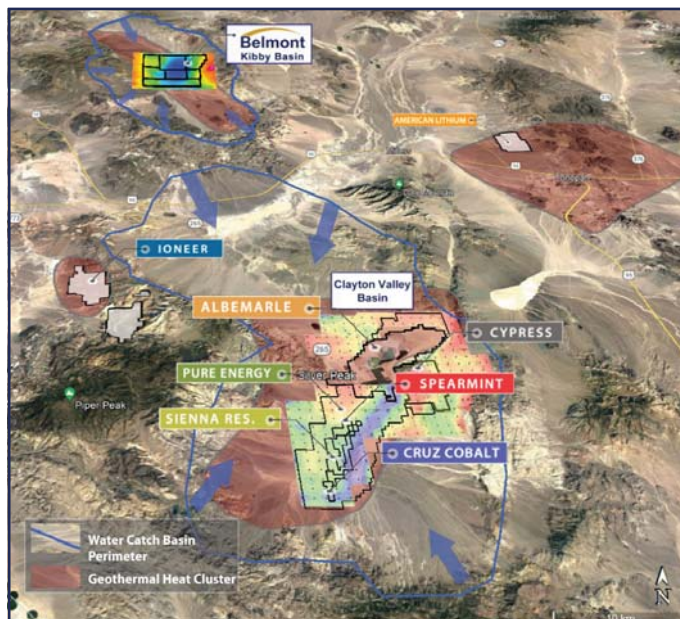

- Phase I - 2,000m drill program completed (assays pending)
- Targetting potential large mineral bearing intrusive with a porphyry/skarn linkage

Belmont Properties in Southern B.C. and Washington State

## Greenwood - Republic Mining Camps

- Four of Belmont’s properties are situated in the prolific Greenwood - Republic mining camps.
- With over 30 past producing mines, this area is considered to be one of the most concentrated mineralized areas in North America.
- All properties situated within 15kms of 200tpd toll mill.
- All necessary infrastructure nearby.
- Accessible all year round.

The Kibby and Clayton Valley Basins, Nevada

## Kibby & Clayton Valley Basins

- JV partner Marquee Resources (ASX.MQR) to spend \$2.5M and issue 3M shares to acquire an 80% interest in the Kibby Playa Block, only one of five-claim blocks on the Kibby Basin owned by Belmont.
- The Kibby Basin properties are located 60 kms north of Clayton Valley Basin.
- The Basin has similar characteristics to the Clayton Basin which makes it conducive to lithium brine content.

### Management & Directors

George Sookochoff, B.Comm.	President, CEO, Director & Chairman
Gary Musil	CFO & Director
James Place, P.Geo.	Director
Laurence Sookochoff, P.Eng.	Director
Geoffrey Peretz	Director
